Bibliography
• Biodegradable balloon-expendable self-locking polycaprolactone stents as buckling explants for the treatment of retinal detachment: An in vitro and in vivo study.

• Ultrasonic measurement of sclera cross-sectional strains during elevations of intraocular pressure: method validation and initial results in posterior porcine sclera.

• Effect of corneal stiffening on Goldmann applanation tonometry and tono-pen measurements in canine eyes.

• In vivo high-frequency contrast-enhanced ultrasonography of uveal melanoma in mice: imaging features and histopathologic correlations.

• Blood velocity measurement in the posterior segment of the rabbit eye using combined spectral Doppler and power Doppler ultrasound.

• Quantitation of hemodynamic function during developmental vascular regression in the mouse eye.

• Advances in ultrasound biomicroscopy.
