Re: End-Of-Sale of Vevo LAZR-X

Dear Valued Customer,

FUJIFILM VisualSonics, Inc. (VSI) would like to thank you for being a longstanding customer. We are committed to providing the highest quality products and services to our customers, ultimately to empower ground-breaking research into the advancement of human health.

We recently launched the new Vevo LAZR-X20 Imaging System. As a result, its' predecessor, the Vevo LAZR-X Imaging System, is being retired.

As of January 1, 2025, VSI ceased offering the Vevo LAZR-X for sale. Support for the Vevo LAZR-X is available based on a sliding window of not less than 5 years from your original system installation date, unless otherwise specified per local law or contractual agreement. All support will cease on June 30, 2030. Please contact the [VSI service team](#) with your LAZR-X system serial number to verify your support status. Available support includes:

- The option to purchase annual service contracts.
- Stocking of replacement parts where possible.
- Scientific applications support regarding the use of the technology in your research.

Moving forward, our latest multi-modal *in vivo* imaging platform, the Vevo LAZR-X20 Imaging System, employs technological advances in lasers and optics that will help transcend barriers in pre-clinical research. With a peak energy of ≥ 135 mJ across an uninterrupted tuning range of 660 – 1320 nm, the LAZR-X20 provides unparalleled resolution and capabilities in real-time photoacoustic imaging. Please contact your local VSI sales representative, or visit the [Vevo LAZR-X20 product page](#) on our website to learn more.

As always, we appreciate your business and look forward to providing you with the best tools to assist you in attaining your research goals.

Regards,

Greg Nesbitt
