INSIGHT THROUGH *IN VIVO* IMAGING™

## Product Lifecycle Announcement: Vevo® 660 End of Life (EOL) Notice January 31, 2011

---

Dear Value Customer,

VisualSonics (VSI) is providing customers with advance notice of the End of Life (EOL) for Vevo 660 High-Resolution *in vivo* Imaging Systems.

VSI will discontinue all support for Vevo 660 on January 31, 2012.

### Technical Support:

VSI's Vevo 660 customers will continue to receive existing levels of Technical Support through the end of their maintenance contract. Due to end of manufacturing of hardware used in the Vevo 660, renewal of existing service contracts past January 31, 2012 will not be supported.

### Migration Path:

VSI will be offering a limited time opportunity for existing Vevo 660 customers to upgrade their Vevo 660 systems to VSI's supported product lines. You are requested to contact your local Sales Representative for further information on the upgrade opportunity.

Sincerely,

Larry McDowell  
Vice President, Sales & Marketing  
VisualSonics Inc.
